

Pure Balance

A symbiosis of function and emotion

Pure Balance

THE INNOVATION OF ACCOMPLISHED BENEFITS

Pure Balance combines the unique attributes of our established “Pure” fabric collection with an upcycled natural yarn component to craft an inventive performance fabric that enhances the well-being tremendously.

The intelligent combination of natural and artificial fibers as well as the conscious avoidance of chemical finishing processes creates the signature for this sustainable fabric construction. Pure Balance intrigues with exceptional durability while preserving resources in the most comprehensive way.

With Pure Balance, considered designwork forms a novel performance fabric. The lab tested construction with breathable and temperature regulating characteristics allows for unprecedented upholstery applications.

PERCEIVED ADVANCEMENT – THE PURE BALANCE EXPERIENCE

Get fascinated by extraordinary performance in combination with an incomparable seating comfort.

A sophisticated production process unites two different yarn components to one functional upholstery fabric. The durable face complements the upcycling cotton component on the back in an unique way.

The result is perceptible! Pure Balance is breathable and temperature adjusting. In addition the jacquard woven fabric compels with an excellent moisture permeability. The Pure Balance experience is manifested in a accomplished yet natural binding structure paired with tremendous color variety.

Pure Balance

TOP PERFORMANCE

*100 %
Made in Germany*

Moisture control:

Due to its capillarity, the ingenious layering structure of Pure Balance uses different yarn components to regulate moisture in a rigorous way. The yarn specific attributes in combination with accomplished weaving techniques ensure a natural seating comfort.

Temperature regulation:

Pure Balance is skin friendly and advantageously adjusts to the body temperature while the two different material components improve the perceived well-being.

Breathability:

The remarkable color variety of Pure Balance captivates by an outstanding breathability – lab tested functionality in the established Gebr. Munzert product quality!

Sustainability:

The deliberate avoidance of chemical finishing processes along with the use of upcycling yarn components perfects the upholstery construction distinctively. Tested for harmful substances, the continuous ecological aspect of Pure Balance portrays the consistent advancement of our “Pure” product line. As decisive symbiosis of function and emotion the firm Pure Balance construction creates added value in a new dimension.
